Continuation of Substance of Interview including description of the general nature of what was discussed:

Left a telephone message proposing an examiner's amendment on Saturday, just past noon, suggesting inserting -- a -- before "silane" & "siloxane" in the independent claims 1, 27 & 50, to clarify reference to the generic classes, as opposed to specific compound, which as the claims & paragraph bridging pages 2-3 in the original specification are referring to attached functional groups, the generic would be the logical meaning. The other above listed dependent claims all have further limitations directed to one alternative option that has not been positively selected, thus proposed adding positive language to these claims. On 10/1/2007, discussed the proposals with Mr. Morrison, as Mr. Cheng was out of the country & he approved proposed amendments to the independent claims, but desired consultation with the applicants on the dependant claims, however as the dependant limitations discussed do not materially effect the allowability, the Examiner's amendment will only address the independent claims, with applicants directing further consideration to the listed dependant claims, to be amended or not by 312 amendment.
